Date: Time				Corrective Action		
Narrative Summa	ry of Air Monitoring, Excu	sions and Corrective A	Actions:			

During the month of September 2023, air monitoring devices were in continuous operation at the project site recording construction-related levels of Particulate Matter (PM). PM10 levels did not surpass Daily Permissible Exposure Limits (PEL) during this month as set by federal standards for the 24-hour Time Weighted Average (TWA), or daily value and did not trigger notifications to the project management construction team or contractor specific to air quality exceedances that could potentially impact the public or on-site workers.

The contractor, NorthStar Contracting Group, Inc. in with their environmental specialist, will implement mitigation techniques at Action Levels as well as Exceedances of Exposure Limits (15-minute TWA) to suppress construction activity effects on air quality when warranted throughout the Project work-zone.

No corrective actions or mitigations measures were required this month.

Units are weighted decibels (dBA) level

2) Community Noise Monitoring Monthly Summary

Office are weighted at	ooloolo (abi	1) 10 101			
Number of Workdays in a Month	Number of Noise Monitoring Days in a Month		Number of Days with Noise Levels above Action Levels by Month		Comments
20	30		0		Noise monitoring was performed during weekdays and weekends. No construction-related exceedances were recorded.
Community Nois Action Level = 3 dBA Stop Work Level = 5	above bac		and Corr	ective Actions	
Date: Time		Maximum Noise Reading before Corrective Action (DBA)		Maximum Noise Reading after Corrective Action (DBA)	Corrective Action
None to Date		No Exceedance		N/A	Noise monitoring was performed during weekdays and weekends. No construction-related exceedances were recorded.
Narrative Summa	ary of Nois	se Monitoring, Exc	ursions ar	nd Corrective Actions:	

During the month of September 2023, noise monitoring devices were in continuous operation at the project site recording construction-related noise levels in units of (DBA). DBA levels **did not** surpass the Noise Limits identified by Local Law 113 during this month and did not cause noise concerns for the surrounding community. There were no notification triggers to the project management team or contractor specific to noise exceedances that could potentially

impact the public or on-site workers.

The contractor, NorthStar Contracting Group, Inc. in conjunction with their environmental specialist, will implement mitigation techniques at Action Levels as well as Exceedances of Exposure Limits to suppress construction activity effects on Noise when warranted throughout the Project work-zone.

No corrective actions or mitigations measures were required this month.

Number of Vibration Monitoring Days in a Month	Number of Days with Vibration Levels above Action Levels by Month	Comments

3	Monitoring Days in a Month 30 Monitoring Excursions and ak particle velocity peak particle velocity Maximum Vibration Level before Corrective Action	Number of Vibration Monitoring Days in a Month 30 Monitoring Excursions and Corrective Actions ak particle velocity peak particle velocity Maximum Vibration Level before Corrective Action Vibration Levels above Action Levels by Month Maximum Vibration Level after Corrective Action

Narrative Summary of Vibration Monitoring, Excursions and Corrective Actions:

During the month of September 2023, vibration monitoring was ongoing throughout the entire month at the project site and vibration monitoring devices were in continuous operation at the project site recording construction-related vibration levels measured in inches per second (in/sec) or IPS. No vibration threshold exceedances were recorded above the Daily Permissible Exposure Limits (IPS) during this month as set by Action Levels = 0.5 in/sec above backgrounds and Stop Work Levels = 1.0 in/sec above backgrounds.

The contractor, NorthStar Contracting Group, Inc. in conjunction with their environmental specialist, will implement mitigation techniques at Action Levels as well as Exceedances to suppress construction activity effects that causes Vibration when warranted throughout the Project work-zone.

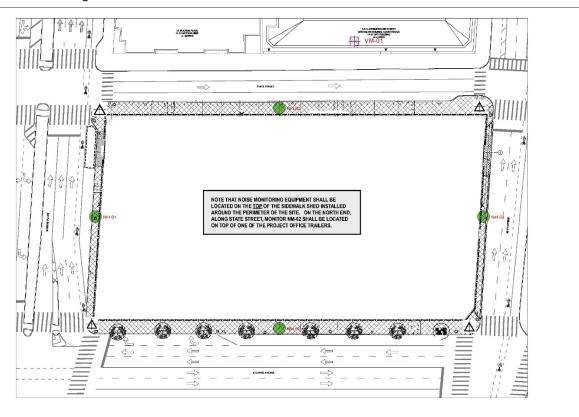

No corrective actions or mitigations measures were required this month.
