Guiding Principles

- Elements to add visual texture, acoustic buffering, and subtle stimulation
- Sense of autonomy and distinct spaces in dayroom
- Clear visual wayfinding queues
- Variety in materiality, colors, and textures to stimulate the senses without overwhelming them
- Variety of soft lighting to deinstitutionalize the space
- Smaller, more intimate spaces through varying floor finishes and furniture types

Understanding Design Grounded in Dignity and Respect

Designing for Equity

- Design buildings and spaces where all human needs are met in an equitable and sustainable manner.
- Foster communities where all people have equal access to shelter, health and nature.
- Design spaces that enrich and inspire all people.
- Design safety and security throughout the facility.

Design Vision

Throughout the facility, people feel physically and

psychologically safe

COLLABORATION

Participants work together to make determinations on programs, schedule and activities that affect people in the space

TRUSTWORTHINESS + TRANSPARENCY

Decisions are made with transparency and with the goal of building and maintaining trust

EMPOWERMENT

People's strengths are recognized, built on, and validated – this includes a belief in resilience and the ability to heal from trauma

PEER SUPPORT

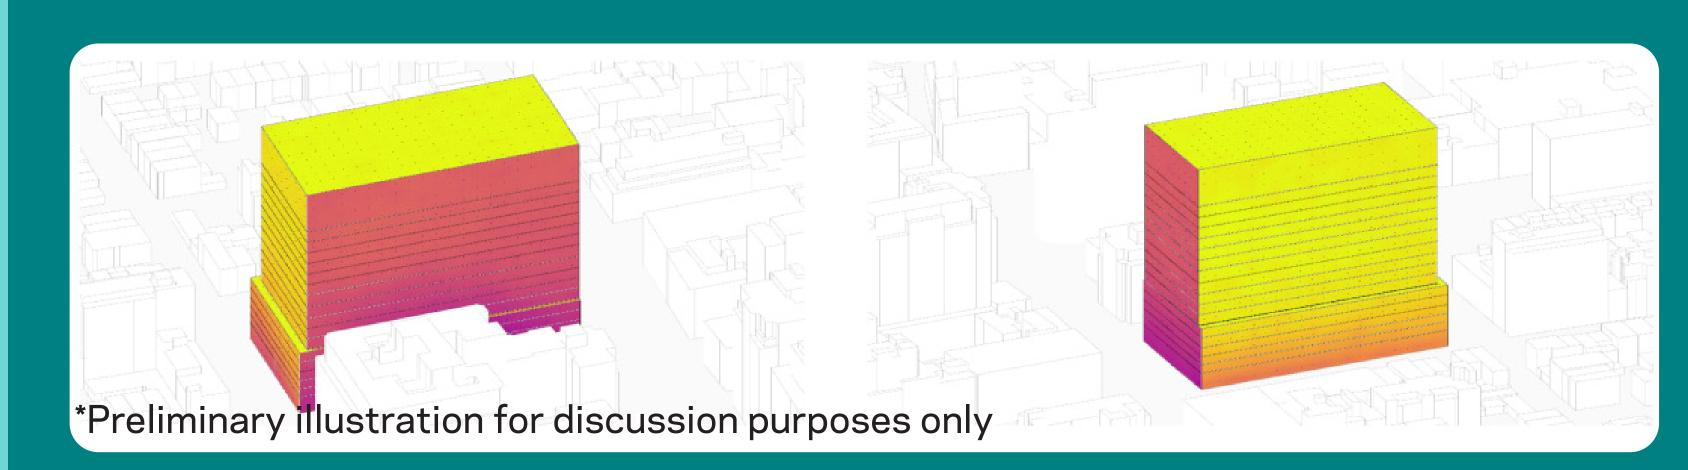

Individuals with shared experiences are integrated into the organization and viewed as integral to service delivery

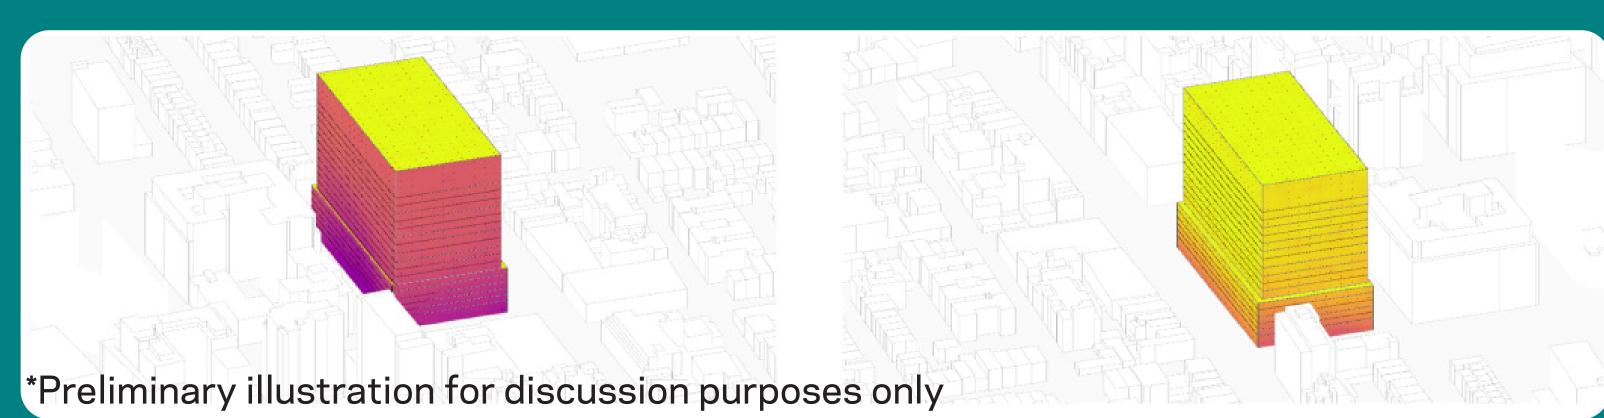

RESPONSIVENESS

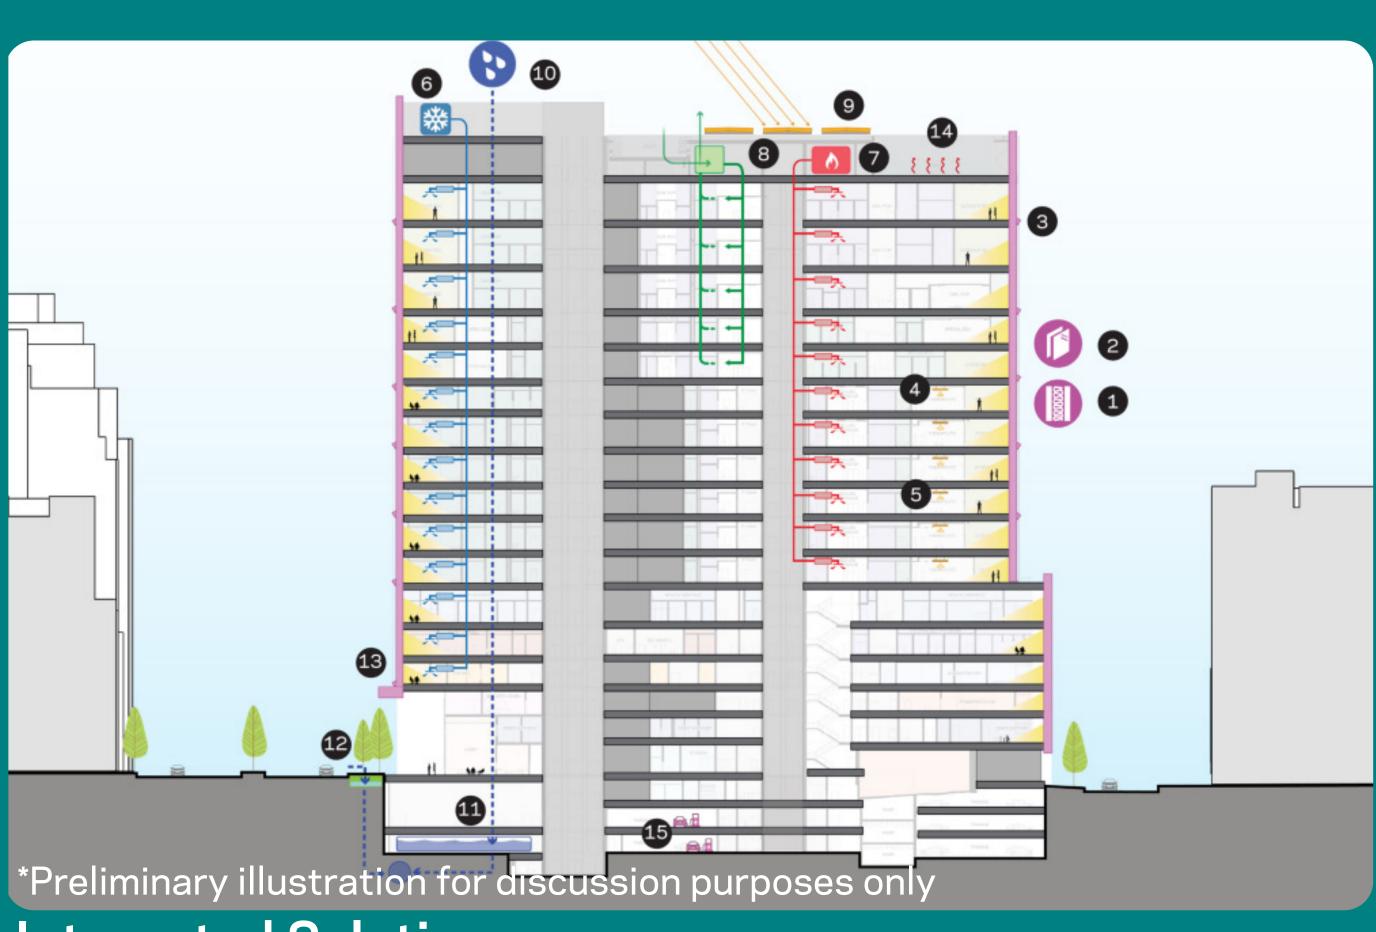

Biases and stereotypes (e.g., based on race, ethnicity, sexual orientation, age, geography) and historical trauma are recognized and addressed

Human-Centric Design

Creating a Humane Environment

- Natural light
- Human experience
- Access to outdoor views
- Medical treatment
- Counseling
- Programs & education
- Variety of materials, colors & textures
